IMPLEMENTATION SUCCESS PROGRAM

The Implementation Success Program is much more than basic user training. Everyone will provide you the basic out of the box training. Printing a poster or banner on the Educator Plus is a
 very easy process. If you can print a document to your desktop printer, you can print a poster or banner on the Educator Plus.

The Implementation Success Program is our commitment to help you integrate the Educator Plus poster printer in your school.

This support could include helping with designing a banner for an event, Creating a backdrop for the stage, creating floor graphics for directional signage, creating a logo. This support is there to help you be creative and maximize this investment. We have over 30 Years experience in this technology.

We also have over 30 years experience in implementing this support via on-line and via our training portal.
Our training portal was originally designed for the US Navy. We developed the program to train Navy sailors on how to create large format decal emblems for their submarines and ships using a large format printer and cut-out system. This was part of a multi-million-dollar program to avoid using paint to create these emblems and save the environment.   The General Manager Larry Girty was the developer of this training program and worked with the US Government in getting it approved under the GSA guidelines. This program has been successful for over 20 years in training sailors across the country.

PASS Educational Template Libraries

The PASS Education Specific Templates are designed to help educators start to create their own custom branded template libraries.

1500+ editable templates that are organized in 12 libraries.

Connect & Create Computer Workstation

The Connect and Create Workstation is an optional computer workstation that comes pre-loaded with all the software, templates, drivers, and profiles. The system is ready to plug the printer in and start printing.

• Software can be installed onto your own computer if you choose NOT to purchase the C&C Workstation.

• If you choose to purchase the workstation, you can still install software on your own computers
   later, if you find you would like to have the design software on multiple computers to
   allow teachers to design during their free time and not be required to sit at the C&C workstation.

Workstation Includes:

• All In One Desktop Computer
• 20" Monitor
• Mouse and Keyboard
• CDRW Drive
• High Resolution Canon Scanner with Scan to Print Feature
• All software and driver pre-installed and computer cleared of all non-required programs

Option - ADD $595

Specialty Materials and Profiles

30 years of experience with large format printing has provided AGC Education the expertise in developing custom media profiles that allow our school partners to unlock the versatility of the Canon printers capabilities.

These media profiles are installed during training and will provide you guaranteed ease of operation, quality and the lowest print cost possible on your standard, every day poster and banner materials. In addition, you will have the ability to print full color graphics on dozens of "specialty materials". Without specially designed media profiles, this is not possible.

Specialty Materials Include:

• Window Cling   • Removable Floor Decal Material • Removeable Wall Decal Material   • Banner Screens   • Static Cling
• Magnetic • Concreted/Asphalt/Brick Decal Material   • View Through Window Perf • T-Shirt Transfer • Poly Silk
• Cotton/Fabric • Back Light Film • Clear Film/Poly Carb Lens • & many more...

These are in addition to the standard materials we offer:
• Standard Poster Paper • Card Stock • Glossy Photo Paper • Satin Photo Paper • Premium Coated Paper • Polly Banner
• Scrim Banner • Canvas • Adhesive Backed Vinyl • & many more

CUT-OUT STUDIO SYSTEM

The Cut-Out Studio is a 24" wide friction fed cutout system. The friction fed system allows you to load 2" scrap material, up to 24" wide rolls. The Cut-Out Studio provides you the ability to cut a wide variety of materials, such as Intermediate and High Performance Vinyl, Reflective DOT vinyl's, Sand blast and paint mask, magnetic, T-Shirt Flock and much more.

The Cutout Studio cutter is integrated with an optical eye, programed with quad point registration.
This feature and our additional software allows you to print full color graphics on adhesive backed, paper or any other material, then load that print into the Cut-Out Studio to then release the cut.
