

WELCOME TO AGC

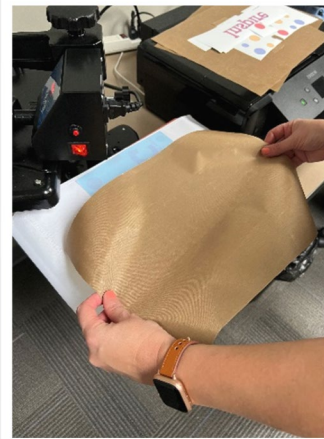

By Julie Mazzacone, Office Manager AGC Education, Inc.

It's always exciting when we get new products! We just received these awesome Garden Flag Kits and I decided we needed to hang a WELCOME sign outside of our office suite.

First, I created a design in Microsoft Word on the AGC Connect & Create Computer. Then I printed the image onto sublimation paper using the AGC Sublimation Station.

The Garden Flag is 11" x 18"; but my sublimation paper is only 8.5" x 11". Therefore, I needed to press the image to the flag in

sections. Using the AGC 8 in 1 Multi Heat Press, I first pressed the "Welcome to AGC." Then added "Suite 601" under the logo and pressed it again.

Next, I wanted to add more "dots" to the flag. From my printed image, I cut out the dots and used the AGC Porta Press Mini to add these colorful accents. To make sure that I did not bleed ink onto our mini press platen, I used a small section of a silicone heat press sheet.

Then, I assembled the flag hanger and attached our new Welcome flag. Here's the completed project outside of our office.
