Celebrating Innovation

As the new school year begins, innovation is our focus this month. We are highlighting two Best in Class examples of bringing hands-on learning to life. See how our partners are using the **Educator Plus Poster Printer** and **Imagin3D & STEM3D** to spark creativity and inspire students in their classrooms.

We are also excited to launch **EmpowR Academy**, a program designed by teachers for teachers, exclusively by AGC. This newly curated platform provides Professional Development, Student Certification, and Financial Flexibility, all while helping schools maximize the value of their current and future technology investments.

PARTNER SPOTLIGHT

SOUTHAMPTON SCHOOL #3
SOUTHAMPTON, NJ

A Standing Ovation for Schoolwide Creativity

At Southampton School #3, the arts came alive with a production of *The Addams Family* made possible in part by their **Educator Plus Poster Printer**. Students and staff used it for custom t-shirts, detailed backdrops, and glossy playbills, turning ideas into hands-on creations that brought the show to life.

This is the power of creativity paired with the right tools—helping students learn by doing and leaving the community with lasting memories. Bravo, Southampton!

TECH SPOTLIGHT

Bringing Learning to Life with Imagin3D

AGC Education helped a middle school in Massachusetts launch a Maker Lab that gives students more ways to learn by doing. Teachers were especially impressed with the **Imagin3D Printers** and **STEM3D** activities, which connect across subjects.

One class used the printers to create 3D characters for a play they had written and filmed, turning their scripts into a mini movie. Experiences like this show how hands-on tools bring learning to life and spark creativity across the curriculum.

With **Imagin3D** and **STEM3D**, AGC provides resources that make active, real-world learning possible in every classroom.

INNOVATION SPOTLIGHT

EmpowR Academy Has Launched

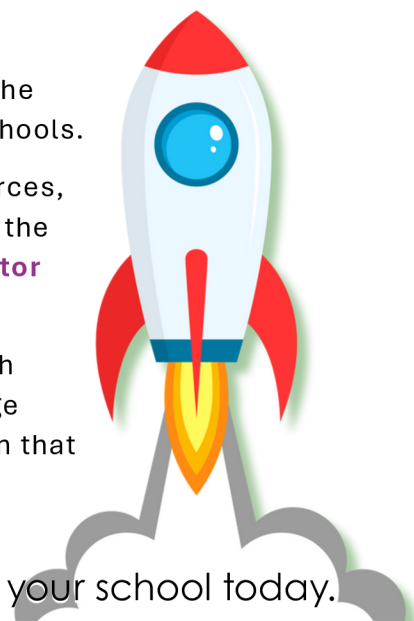

This back-to-school season, we are excited to launch **EmpowR Academy**, AGC Education's professional development program designed to help educators get the most from our equipment and bring creativity, clarity, and community to their schools.

With **EmpowR Academy**, teachers gain hands-on strategies, ready-to-use resources, and classroom-tested ideas for every corner of the school. Created by teachers, the program also builds confidence with tools already in classrooms, like the **Educator Plus Poster Printer**, through practical templates and step-by-step guidance.

Training is available through live one-on-one sessions or self-paced lessons, with certifications offered for both teachers and students to grow skills and encourage student-led learning. With three levels of support, schools can choose the option that best fits their goals and bring more hands-on engagement to learning.

Ready to get started?

Give us a call to discover how EmpowR Academy can support your school today.

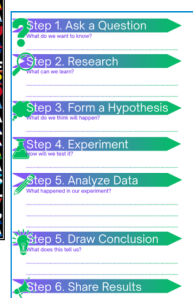

AGC NEWS

Teacher Resources

September's resources are practical, easy to use, and designed to help educators bring active, hands-on learning into the classroom.

- **Hispanic Heritage Month** – Materials to honor culture, history, and contributions that enrich our communities.
- **STEM Anchor Charts** – Visual guides that give students clear steps for tackling STEM challenges.
- **Athletics & Athlete Recognition** – Resources to highlight student-athlete accomplishments, encourage teamwork, and build school pride.
